

Content in context.

Use your **Microsoft** products to get closer to your **customers**

Create Customized Customer-Facing Material in Seconds

- 360 account reviews -

- Sales Presentations -

- Contracts -

Outlook

Seismic can be accessed in Outlook and suggest content based on information about the opportunity in Dynamics.

Dynamics CRM

Seismic integrates with data from Dynamics CRM, pulling data into your documents seamlessly and storing data back into Dynamics.

Office

Most companies generate data in Excel and create documents in PowerPoint and Word. Our Office integration is the backbone of our technology.

SharePoint

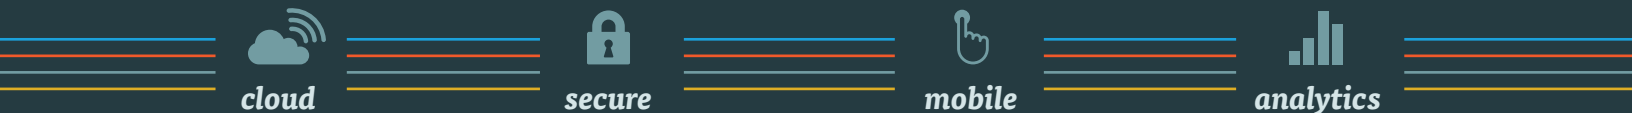

Seismic's native Sharepoint application allows access to LiveDocs alongside other Sharepoint documents, plus integration into existing workflows.

Windows 10

Use Seismic's native Win 10 app to access client materials on a tablet.

Azure

We built Seismic on the Azure cloud to ensure your data security.

About Seismic

Seismic is the mobile content management platform that enables companies to increase marketing efficiency and sales effectiveness. By bringing together content generation, real-time data services, powerful analytics and a user-friendly interface, Seismic's cloud-based platform enables companies to quickly create customized, compliant materials that resonate with customers and prospects. With Seismic, business professionals on-the-go are not only equipped with personalized materials for current and prospective customers, but also have more time to focus on the customer experience and close more deals.
